

Sprinkler Splash Pad User Manual

Splash & Water Fun in Summer

The splash sprinkler pad is a summer outdoor water toy that is perfect for pets and kids from 4 to 12 years old, perfect for placing on a flat lawn to enjoy a summer fun day.

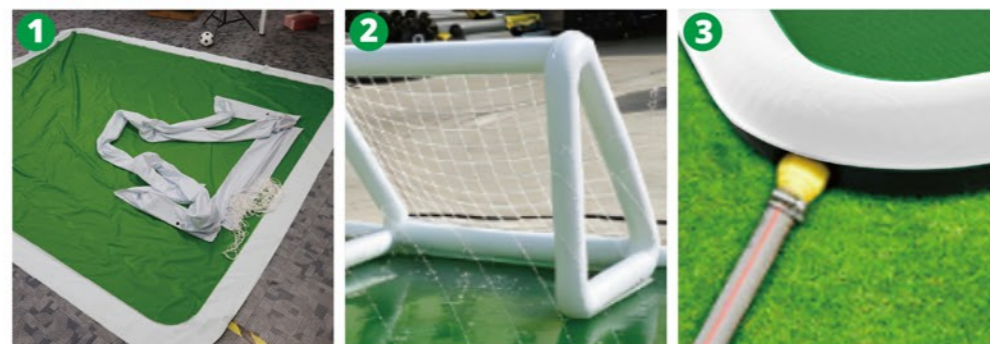

◆ DETAILS

Name: Splash Sprinkler Pad

Material: Environmentally friendly PVC

Occasions: Lawn party, garden, swimming pool or beach.

◆ INSTALLATION

1. Lay the sprinkler pad flat on a level surface.
2. Inflate the goal and attach the net.
3. Connect the water inlet to the water source.

◆ WATER CONNECTION

1. Install the water pipe connector.
2. Connect the water pipe to the mat.
3. Attach the water pipe to the faucet.

Tips: If you have a hose, connect it directly; if not, use the included adapter, then turn on the water, ensuring an even flow.

◆ WATER FLOW DIRECTION ADJUSTMENT

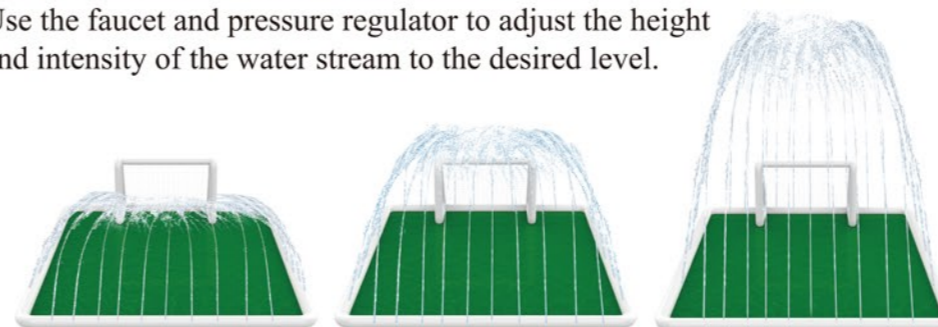

1. If the pad is placed on uneven ground, the water may spray outward.
2. Adjust the edges of the pad to direct the water inward.

NOTE: The water pressure will be high during filling; adjust carefully to avoid damage.

◆ SPRAY HEIGHT ADJUSTMENT

Use the faucet and pressure regulator to adjust the height and intensity of the water stream to the desired level.

◆ WARNING TIP

- Upon opening, an unpleasant odor may occur due to manufacturing. For best results, hang in a well-ventilated area for 1-3 days before use.
- Recommended for outdoor use on grass only. Keep away from sharp objects and sources of fire.
- Do not use high-pressure water for filling, as excessive pressure may damage the splash pad. Start with low pressure and gradually adjust.
- Do not move the splash pad once filled with water. If needed, empty and refill at the new location.
- After use, hang the splash pad to dry. Avoid direct sunlight exposure.

◆ PACKAGE CONTENTS
